

The Spiritual Dimensions of Vedic Astrology, by Robert A. Koch

(Review by Howard Beckman, director Vedic Cultural Fellowship)

This new book by Robert Koch is groundbreaking in that it seeks to instill in the reader the very essence of Vedic philosophy and spiritual science, which is at the core of the science of jyotish, or Vedic astrology. Never before has any western jyotish teacher sought to bring his students to the spiritual heart of this ancient science of divination.

From the first chapter, which delineates the Vedic science and philosophy of creation of the universe and Vedic cosmology in general, a strong understanding of how the material universe is manifested is given. Robert then brilliantly joins these understandings with the astronomical and cosmological divisions of not only our planetary system, but gives the Vedic understanding of the multiple planetary systems of our universe, the unfolding of karma and the science of reincarnation, or transmigration of the soul.

Robert delves into some of the most advanced principles of the Vedic astrological science so those with aspirations to learn the greatest of “secrets” and techniques of prediction will find an uncommon wealth of knowledge within these pages. The case studies of well-known spiritually advanced personalities, as well as psychics and clairvoyants through the ages, give the beginning, as well as advanced student, a basis for understanding the most important directives of human existence, as seen through the eyes of Vedic spiritual truth.

I would strongly recommend this book to all serious students of Vedic astrology. For the beginning student it provides concepts and knowledge to inspire one towards higher realization and for the advanced student provides an understanding of the spiritual dimensions of a horoscope like no other text available on the market today.

The Spiritual Dimensions of Vedic Astrology

419 pages, softbound, 8.5” x 11”
